Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313-1450

Sir:

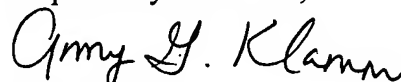

Submitted herewith is a computer readable form and a substitute paper copy of the sequence listing of those sequences in the captioned patent application. The computer readable form of the sequence listing is the same as the substitute paper copy of the sequence listing.

The sequence information provided in the Specification has been corrected in view of two sequencing errors and these corrections are reflected in the substitute paper and computer readable forms of the sequence listing. These corrections are described in detail in the Preliminary Amendment submitted herewith. Briefly, the newly submitted sequence listing makes corrections at positions 385 and 386 of the nucleotide sequence (SEQ ID NO:1) and at position 129 of the corresponding amino acid sequence (shown in SEQ ID NO:1 and SEQ ID NO:2).

Accordingly, the corrected sequence listing in the Specification is the same as the sequence information contained in the enclosed substitute computer readable and paper forms of the sequence listing which have also been updated to Patent In Version 3.2.

In accordance with 37 C.F.R. § 1.821(g), it is herewith represented that no new matter is included with this submission.

Respectfully submitted,

Amy G. Klann
